

Clearer operations. Better-informed decisions.

Dear Business Owner,

We are pleased to introduce NivoAura, a software venture focused on helping automotive businesses bring greater clarity to their operations and commercial decisions.

Our two products serve distinct business needs:

Overdrive helps car-rental businesses connect pricing, fleet utilization, sales, marketing and operational performance. It supports the review of idle vehicles, rental contribution, competitor-rate information and actions that managers can assess and track.

Garage OS helps automotive workshops manage the journey from customer and vehicle check-in to estimates, approvals, repairs, parts, invoicing and payment tracking. It gives teams a shared workflow and owners clearer visibility over work in progress and outstanding payments.

We are inviting selected rental operators and workshops to discuss a focused pilot. We begin with your priorities, agree the relevant workflow and data requirements, and define a practical scope for evaluation.

We would welcome the opportunity to arrange a short demonstration and learn more about your business.

Please contact us at nivoaura@gmail.com.

Kind regards,

The NivoAura Team

Overdrive · Garage OS
